Large heat/ice pack inside nylon protective sleeve (as shown above) secures in place with hook and loop material

'NSI™' rash guard panels deliver extreme flex and comfort around the oblique sections of the body

Active medical plush™ material offers a soft flexible fit against the skin for improved Compliance during treatments.

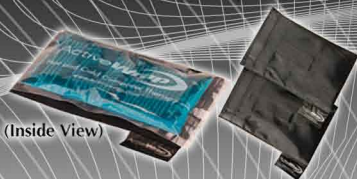

## Heat & Ice Kits

Complete with two washable nylon protective sleeves (latex free) and two thermal inserts. ActiveWrap® thermal inserts are microwave, hot-water, and freezer safe. Guaranteed to stay soft and mold around your injury. ActiveWrap® packs are engineered non-toxic and made of food grade material that is safe and completely unscented. We also go a step further and vacuum seal any unnecessary air from our packs to reduce expansion. The ActiveWrap® nylon pouches can be filled with crushed ice for emergency or on field applications to add to their unique versatility. The average pack lifespan is 2 to 3 years of use everyday when proper care is followed. Included in your purchase is a full one year guarantee against manufacturing defects. We invite you to feel the difference.
